Working with a Broker

As a new real estate licensee you will need to work under the direction and supervision of a principal broker. Students should begin interviewing with brokers as they wrap up their schooling and complete the state exam. It is important that licensees are placed with brokers that will help them in their needs and answer their questions as a new real estate agent.

There are also a variety of other items that should be considered when looking for a broker to work with. It is not just all about the commission split. Some of the following items should be considered:

- Training Opportunities What training opportunities are available for new agents?
- Referral Opportunities and Networks How does the brokerage help new agents get clients?
- Technology What technology is used to help clients and in marketing efforts?
- Real Estate Specialties What property types does the broker specialize in?
- **Commission Splits** What commission split is given to new agents? On what schedule does the commission split change?
- Office Location/Environment Where is the physical office? What amenities are available? What is the office culture like?
- Written Agreement What is found on the written agreement between the broker and agents?
